

Dear Frontiers North Guest,

Thank you for choosing Frontiers North Adventures for your adventure in Canada's North! We are delighted you have chosen to travel with us on your Churchill adventure.

As a Certified B Corporation™, we strive to benefit the communities and environments in which we operate, acting as a force for good. Our purpose is to share in the stewardship of this incredible place and its wildlife, and hope that you too become inspired to do the same.

By joining a Frontiers North adventure, you can have confidence and trust in our commitment to sustainability. We are proud to have two EV Tundra Buggies in our fleet, with the goal to convert the remaining touring fleet to zero-emission electric propulsion by 2030. Our EV Tundra Buggies operate silently under the northern lights and amongst wild polar bears and are powered by clean and 100% renewable electricity generated right here in Manitoba.

Our team has compiled a wealth of information in this predeparture package to help you prepare for your upcoming adventure with us. If you have any questions that aren't addressed in the information we've provided, please contact one of our Adventure Planners for support. We are here to help ensure you have an incredible experience to remember forever.

We consider it a privilege to share this beautiful part of our country with guests from around the world and look forward to hosting you.

In all kindness,

A handwritten signature in black ink, appearing to read "John Gunter".

John Gunter
